List of Contents

NUMBER 1

A. Elgarayhi 1 Solution of the dynamic equation of aerosols by means of maximum entropy technique

R.A. Shaw, A.B. Kostinski and D.D. Lanterman 13 Super-exponential extinction of radiation in a negatively correlated random medium

C.E. Siewert 21 Two half-space problems based on a synthetic-kernel model of the linearized Boltzmann equation

K. Masuda, H. Ishimoto and T. Takashima 39 Retrieval of cirrus optical thickness and ice-shape information using total and polarized reflectance from satellite measurements

Q. Zou, V. Nemtchinov and P. Varanasi 53 An instrumental function and a non-linear least-squares multi-spectral-line-fitting algorithm applicable to FTS studies

Q. Zou and P. Varanasi 63 New laboratory data on the spectral line parameters in the 1-0 and 2-0 bands of $^{12}C^{16}O$ relevant to atmospheric remote sensing

D.W. Mueller Jr. and A.L. Crosbie 93 Three-dimensional vector radiative transfer in a semi-infinite, Rayleigh scattering medium exposed to spatially varying polarized radiation: generalized reflection matrix

S. Magnier and M. Aubert-Frécon 121 Static dipolar polarizabilities for various electronic states of alkali atoms

NUMBER 2

R.J.D. Spurr 129 Simultaneous derivation of intensities and weighting functions in a general pseudo-spherical discrete ordinate radiative transfer treatment

R.F. van Oss and R.J.D. Spurr 177 Fast and accurate 4 and 6 stream linearized discrete ordinate radiative transfer models for ozone profile retrieval

O.P. Hasekamp and **J. Landgraf** 221 A linearized vector radiative transfer model for atmospheric trace gas retrieval

N.A.J. Schutgens and **P. Stammes** 239 Parametrisation of Earth's polarisation spectrum in the ultra-violet

NUMBER 3

T. Sghaier, B. Chérif and **M.S. Sifaoui** 257 Theoretical study of combined radiative conductive and convective heat transfer in semi-transparent porous medium in a spherical enclosure

L. Ibgui and **J.-M. Hartmann** 273 An optimized line by line code for plume signature calculations—I: model and data

C. Rathke and **J. Fischer** 297 Evaluation of four approximate methods for calculating infrared radiances in cloudy atmospheres

J.J. O'Brien and **H. Cao** 323 Absorption spectra and absorption coefficients for methane in the 750–940 nm region obtained by intracavity laser spectroscopy

N. Ekinci, G. Budak and **A. Karabulut** 351 Energy dispersive X-ray fluorescence spectrometry in the detection of Ikizdere ore concentrates

Notes

L.H. Coutinho and **A.G. Trigueiros** 357 Weighted oscillator strengths and lifetimes for the Si I spectrum

Z. El-Gohary 389 Theoretical and experimental treatment of the spectral interferences in atomic absorption spectroscopy

NUMBER 4

D. Jacquemart, J.-Y. Mandin, V. Dana, L. Régalia-Jarlot, X. Thomas and **P. Von der Heyden** 397 Multispectrum fitting measurements of line parameters for 5-μm cold bands of acetylene

D.W. Mueller Jr. and **A.L. Crosbie** 423 Three-dimensional vector radiative transfer in a semi-infinite, Rayleigh scattering medium exposed to a polarized laser beam: spatially varying reflection matrix

V.M. Devi, D.C. Benner, M.A.H. Smith, C.P. Rinsland and **A.W. Mantz** 455 Determination of self- and H_2-broadening and shift coefficients in the 2-0 band of $^{12}C^{16}O$ using a multispectrum fitting procedure

E. Baydaş, Ö. Söğüt, Y. Şahin and E. Büyükkasap 473 Variation of K X-ray fluorescence cross-sections of Ti, V and Cr in halogens compounds in energy interval 5.5–12.1 keV

L.H. Liu and B.X. Li 481 Inverse radiation problem of axisymmetric turbulent sooting free flame

B. Parvitte, V. Zéninari, I. Pouchet and G. Durry 493 Diode laser spectroscopy of H_2O in the 7165–7185 cm^{-1} range for atmospheric applications

Notes

R.R. Reddy, Y.N. Ahammed, K.R. Gopal, T.V.R. Rao, P.A. Azeem, S. Buddhudu and N.S. Hussain 507 Spectral properties of Eu^{3+} : B_2O_3–AlF_3–RF glasses

S.A. El-Wakil, M.A. Abdou and A. Elhanbaly 517 On the solution of Fokker–Planck equation for electron transport

NUMBER 5

A. de Lataillade, S. Blanco, Y. Clergent, J.L. Dufresne, M. El Hafi and R. Fournier 529 Monte Carlo method and sensitivity estimations

J.M. Gil, P. Martel, E. Mínguez, J.G. Rubiano, R. Rodríguez and F.H. Ruano 539 An effective analytical potential including plasma effects

F.R.T. Luna, G.H. Cavalcanti, L.H. Coutinho and A.G. Trigueiros 559 A compilation of wavelengths and energy levels for the spectrum of neutral rubidium (Rb I)

D. Lacroix, G. Parent, F. Asllanaj and G. Jeandel 589 Coupled radiative and conductive heat transfer in a non-grey absorbing and emitting semitransparent media under collimated radiation

T.R. Sreerekha, S. Buehler and C. Emde 611 A simple new radiative transfer model for simulating the effect of cirrus clouds in the microwave spectral region

I.E. Golovkin, R.C. Mancini, S.J. Louis, R.W. Lee and L. Klein 625 Analysis of X-ray spectral data with genetic algorithms

L.H. Liu and L.M. Ruan 637 Numerical approach for reflections and transmittance of finite plane-parallel absorbing and scattering medium subjected to normal and diffuse incidence

A.A. Hendi and E.M. Abulwafa 647 Heat transfer in a spherical turbid medium with conduction and radiation

NUMBER 6

D.W. Mueller Jr. and **A.L. Crosbie**	661	Three-dimensional radiative transfer in an anisotropically scattering, plane-parallel medium: generalized reflection and transmission functions
R. Rodríguez, J.G. Rubiano, J.M. Gil, P. Martel, E. Mínguez and **R. Florido**	723	Development of an analytical potential to include excited configurations
Ö. Şimşek, M. Ertugrul, A. Karabulut and **G. Budak**	741	Inelastic scattering of 59.5 keV photons at small momentum transfers by Ti, Fe and Ni elements
H. Amamou, A. Bois, B. Ferhat, R. Redon, B. Rossetto and **P. Matheron**	747	Correction of self-absorption spectral line and ratios of transition probabilities for homogeneous and LTE plasma
J. Steinacker, A. Bacmann and **T. Henning**	765	Application of adaptive multi-frequency grids to three-dimensional astrophysical radiative transfer
